ON THE

COVER

This month's cover comes from the spot on the globe where North America and Europe split apart. The Mid-Atlantic Rift runs through Iceland and moves apart about 2 cm a year, leaving a canyon where the tectonic plates are spreading apart. After YAPC::EU, brian d foy, Adam Kennedy, and Josh McAdams visited the "Bridge Across the Continents" and couldn't help but leave a bit of environment-friendly graffiti, spelling out #!perl in volcanic rock. Stayed tuned for news of a Perl event in 2010 in that country.
