

Outcome Technologies Limited, a BUPA company, provides software, services, and data hosting for patient compliance, outcomes research, patient support programmes, and the management of outcomes, diseases, and long term conditions.

The Outcome Technologies technical team uses Perl and other open source tools to develop software that complies with the strictest international security standards (for example, Outcome Technologies deploys its software in compliance with BS7799:2002:Part 2 and BS EN ISO9001:2000).

As a sponsor of the YAPC::Europe 2005, Outcome Technologies continues to support the Perl community.
